Collections

V01.19

When renovating your kitchen, make sure you choose a sink that is right for you. Just remember, the sink is the most used appliance in the house! Don't let someone make that choice for you. Ask yourself what is important to you while working at your sink. Do you need two bowls? Maybe you like the idea of one large bowl. Are you a tall person? If so, maybe a deep sink is not a good idea for the sake of your back

and leaning over all the time. At Nantucket Sinks, we have created a product line that fits your needs. Our drawn stainless steel sinks are top quality 304 Stainless Steel. Choose from our sturdy, quality 18 gauge stainless to our premium 16 gauge offerings. If you are looking to swap out an existing sink, our topmounts include many 18 gauge offerings.
